

# Midstream Commercial Forensic Review

## Forensic Review

COG will conduct a *no-obligation, free-of-charge* review of all of your midstream contracts (transportation/processing, marketing and storage)

### Typical Findings

- Out-of-market rates/fees
- "Hidden" fees
- Improperly assessed fees
- Excessive PLA's/LAUF
- Better netback options
- Missed revenue opportunities (e.g. blending)
- Contract rework opportunities (e.g. blend and extend)

At the conclusion of COG's review, customer has option to engage COG to implement its recommendations through a consulting arrangement, where the parties agree to share cost savings

### Common Misconceptions

- We're under long-term contract and can't change agreements
- We have adequate midstream expertise in-house
- We can't share our contracts
